Products for Surgery / ICU

Ultrasonic Transit-Time Volume Flow Measurement Systems

1. HT300-Family of Surgical Flowmeters (Asia)	
A. Surgical Capabilities	1
B. Surgical Benefits	2
C. Transit-Time Ultrasound Theory of Operation	3
D. HQ-Series Surgical Flowprobes & Flowsensors (Overview)	4
1. Surgical Flowprobe/Flowsensor Selection Guides	
a) Legend for Ordering Flowprobes/Flowsensors	7
b) Surgical Flowprobe/Flowsensor Selection Guide	8
c) Flowprobe/Flowsensor and Flowmeter Compatibility Guide	9
2. Surgical Flowprobes/Flowsensors by Application	
a) Coronary Bypass Surgery	10
b) Great Arteries and Veins, CO, Portal Vein	12
c) Vascular Surgery	13
d) Carotid Endarterectomy	15
e) Intracranial Surgery	16
f) Bypass Tubing Flow-QC	17
E. 300-Series Surgical Flowmeters (Overview)	18
1. HT310/HT320	20
2. HT313/HT323	21
3. Flowprobes/Flowsensors for Retired Flowmeter Models	23
4. 300-Series Functions & Controls	24
5. 300-Series Flowmeter Specifications	25
F. Surgical Application-based Support	26
1. Cleaning & Sterilization	27
2. HT110 Bypass/ECMO Flowmeter (Overview)	28
A. HT110 Capabilities	29
B. Applications	30
C. Transit-time Ultrasound Theory of Operation	31
D. HT110 Functions & Controls	32
E. HT110 Specifications	33
F. H-XL Sterile Tubing Flowsensor	34
1. Sensor and Tubing Specifications	35
2. Physical/Accuracy Specifications	36

Laser Doppler Perfusion Monitoring in ICU

BLF21A Laser Doppler Flowmeter (Overview)	1
A. Capabilities	2
B. Applications	3
C. Laser Doppler Theory of Operation	4
D. BLF21A Functions & Controls	5
E. BLF21A Specifications	6
F. BLF21A Laser Doppler Probes	7
G. Probe Sterilization and Care	8
