Notice of HD03CO & Accessories Obsolescence in Europe/Middle East/Africa

Dear Transonic Customer,

Regretfully, Transonic has made the difficult decision to discontinue the sale of the current HD03 Hemodialysis Monitor with Cardiac Output functionality (HD03CO), and the associated modules (DTM, DTM-CO, and PMM-CO), effectively immediately. We continue to endorse the value of Cardiac Output measurements for Hemodialysis patients, however, the combination of the investment to meet MDR requirements and supply issues with the supply of Flow QC tubing sets (ADT1010) has led us to this decision. The HD03 with PMM will be our sole offering to customers in Europe, the Middle East, and Africa. The HFW1000 Saline Bag Warmer and the ADT1010 Flow-QC tubing will continue to be available until January 2023. We apologize for any inconvenience this may cause you. Please contact your Transonic Sales Representative or Transonic Customer Service if you have any questions.

Sincerely,

Miriam Tenorio, President & CEO
Transonic Systems Inc.
